DETERMINATION

25X1

1. At the end of May or the beginning of June 1952 a heavy machine gun company was transferred to the castle at Valtice (P49/S65). There were 42 men in the company. The soldiers constructed machine gun positions in the area between Sedlec (P49/S55) and Postorna (P49/S65). The location of only two of the machine gun positions could be determined, one at the southern edge of Valtice and the other southwest of Valtice in a recently cleared section of the forest.

2. When the construction of the machine gun positions was completed the soldiers engaged in night maneuvers. It was expected that they would soon be joined by other troops.
